Supreme Plumbing 775-329-3200

### Notes:

1. Prices may vary between contractors. Please be sure to inquire about pricing.
2. It is not necessary to have backflow prevention assemblies installed by a certified backflow tester, but it is required that all backflow prevention assemblies be tested by a certified backflow tester upon installation completion, annually and upon repair of the assembly.
3. Douglas County Community Development will accept a test report from any individual not on this list when the test report is accompanied with a copy of the tester's current certification from the California-Nevada Section of the American Water Works Association as a certified backflow tester.
